

Metal Halide Industrial Tower Light

This metal halide tower light delivers powerful illumination for industrial applications. Its robust construction features corrosion resistance, stainless steel fasteners, and a thick tempered glass cover.

Overview

Industrial-Grade Illumination

The TG1000 flood tower light is a robust lighting solution engineered for demanding industrial environments. It features a high-quality aluminum alloy shell with excellent thermal management and seismic resistance, ensuring durability in harsh conditions. Equipped with a 5mm thick tempered glass cover, it provides superior light transmission and strength for consistent performance in large outdoor areas.

Technical Specifications

Luminous Flux

75000 Lm

Light Output

Power Rating	1000W - 1250W
Lamp Type	BT37 Metal Halide
Average Lifespan	10000 hours

Construction & Durability

Key Structural Features

- Excellent thermal design
- Seismic resistance
- Corrosion resistance
- High light transmission

Material Composition	Aluminum Alloy Shell, Stainless Steel Fasteners, Tempered Glass
Glass Thickness	5 mm
