

Metal Lathe Machine

This precision metal lathe is designed for turning, facing, and threading operations. It features a robust cast iron bed for stability and vibration dampening.

Overview

Precision Engineering Performance

This precision metal lathe is engineered for demanding turning, facing, and threading operations. Built with a robust cast iron bed, it offers superior stability and vibration dampening for consistent high-quality results. The machine features a versatile variable speed drive, ensuring optimal cutting performance across a wide variety of materials.

Technical Specifications

Key Features

- Variable speed drive
- Manual and power feed options
- Robust cast iron bed
- Three-jaw chuck
- Tailstock support

Model Identifier

CQ6240K1000

Safety & Compliance

Safety Equipment

Chuck Guard, Emergency Stop Button
