

Metal Mesh Roll Container

This green metal roll container has a sturdy base and four swivel casters. Its wire mesh construction provides ventilation and visibility of the contents, making it suitable for transporting and storing goods.

Product Overview

High-Efficiency Metal Mesh Roll Container

The Metal Mesh Roll Container is an essential solution for streamlining logistics in warehouses, retail environments, and distribution centers. Its robust wire mesh construction ensures excellent ventilation and visibility, while the three-sided design allows for easy loading and unloading of goods. Equipped with four heavy-duty swivel casters, this container offers superior maneuverability and efficiency for your material handling needs.

Technical Specifications

Model Identifier	TC4616
Construction	Wire mesh
Configuration	Three-sided with open front

Mobility

Caster Type	Swivel casters
Wheel Count	4

Usage

Ideal Applications	Warehousing, Retail, Distribution, Logistics
