

Metal Mounting Brackets for Electronic Equipment

These metal brackets are designed to mount and support electronic equipment. Each bracket features a matte gray finish, square mounting blocks, and a central support brace.

Product Overview

Professional-Grade Mounting Solution

These metal mounting brackets are engineered for secure installation and support of electronic equipment. Featuring a robust design with square mounting blocks at each end, these brackets provide structural integrity for demanding environments. The matte gray finish ensures a professional aesthetic suitable for various industrial and commercial electronic setups.

Physical Characteristics

Finish	Matte Gray
