

Metal PBR Roof Sheet Roll Forming Machine

This high-end PBR roof sheet forming machine is designed for metal processing. It features advanced roll forming technology to produce precise and durable roof sheets.

Overview

High-Efficiency Metal PBR Roof Sheet Forming Machine

This industrial-grade roll forming machine is engineered for the precise production of steel roof and wall panels. Designed for high-volume metal processing, it offers a consistent production speed of 10 meters per minute, making it an ideal solution for large-scale steel construction projects. With robust build quality and a 380V power system, this equipment ensures reliability and durability for demanding manufacturing environments.

Technical Specifications

Power Requirements

5.5 kw

Power Consumption

380 V

Voltage

Production Speed

10 m/min

Dimensions & Logistics

Machine Dimensions

6600 x 1400 x 1300 mm

Estimated Delivery

60 days

Compliance & Support

Certifications

BV

Warranty & Support

- 1-year warranty
- Engineers available for overseas service

Application

Primary Application

Roof Panels, Wall Panels, Steel Construction
