

Metal Pipe Fittings Assortment

These metal pipe fittings are designed for plumbing and industrial applications. The assortment includes elbows, T-connectors, compression couplings, and spherical fittings.

Product Overview

Professional Metal Pipe Fittings Assortment

This versatile assortment of metal pipe fittings is designed for essential plumbing and industrial fluid management systems. The collection includes critical components such as 90-degree elbows, T-connectors, compression couplings, and spherical fittings. These parts are engineered for high-integrity connections, utilizing both threaded interfaces and preparation for permanent welding or soldering applications.

Technical Specifications

Included Components

- 90-degree elbow
- T-connector
- Compression coupling
- Spherical fitting

Applications

Plumbing • Industrial Piping

Connection Methods

Threaded, Welding, Soldering
