

Metal Pipe Support Clamp

This heavy-duty clamp is designed for securing pipes and tubes. It is constructed from durable metal and provides reliable support and stability.

Product Overview

Heavy-Duty Pipe Support

This metal pipe support clamp is engineered for robust performance in demanding industrial and construction environments. Featuring a reliable two-piece design with secure bolted connections, it ensures stability and vibration dampening for various pipe and tube systems. The clamp is built for easy installation and precise adjustment, providing a professional solution for secure pipe mounting.

Technical Specifications

Material	Durable Metal
Design Type	Two-piece clamp
Installation	Bolted connection

Applications

Primary Applications	Industrial, Construction, Pipe Mounting
----------------------	---

Features

Key Features

- Heavy-duty construction
- Vibration dampening
- Adjustable design
- Secure bolted connection
