

Metal Pipes and Tubes

These metal pipes and tubes are designed for durability and strength. They are suitable for use in a variety of industrial and construction applications.

Product Overview

Industrial Metal Piping Solutions

These metal pipes and tubes are engineered to meet rigorous industrial standards, offering durability and high performance for a wide range of applications. Designed for reliability in demanding environments, they provide excellent structural integrity and corrosion resistance. Ideal for construction, fluid transport, and infrastructure projects, our piping solutions ensure seamless integration into your existing systems.

Technical Specifications

Compliance Standards

ASTM • ISO 9001 • DIN • JIS

Material Composition

Carbon Steel, Stainless Steel, Alloy Steel

Dimensions and Capacity

Available Diameter Range

10 mm

Minimum Diameter

1200 mm

Maximum Diameter

Wall Thickness Options

- Schedule 10
- Schedule 40
- Schedule 80
- Schedule 160

Application

Primary Applications

- Oil and Gas Pipelines
- Structural Construction
- Water Treatment Systems
- Automotive Components
- Boiler and Heat Exchanger Tubes
