

Metal Plated Wired Microphone

This wired microphone is designed with metal plating for enhanced durability and aesthetic appeal. It utilizes a dynamic capsule to deliver clear and articulate sound, suitable for various audio applications.

Product Overview

Professional Performance Microphone

The PT-796 is a high-quality metal-plated wired microphone engineered for reliability and clear sound reproduction. Featuring a robust zinc alloy construction, this dynamic microphone is suitable for both vocal performances and public speaking applications. With its advanced technology and durable finish, it offers professional performance at a competitive price point.

Technical Specifications

Microphone Type	Dynamic
Directivity	Uni-directivity
Frequency Response	50-14000Hz
Sensitivity	-74dB ±3dB
Impedance	600 ©

Construction & Design

Housing Material	Zinc alloy with spray painting
Integrated Features	Metal Plating, On/Off Switch, Wired
