

Metal Profile Roll Forming Machine

The Metal Profile Roll Forming Machine is a robust solution for manufacturing metal profiles. It is designed to handle various materials and thicknesses, providing precise and consistent results.

Product Overview

Industrial Roll Forming Efficiency

This industrial-grade roll forming machine is engineered for the high-precision production of steel roof and wall panels. Designed for demanding steel construction environments, it features a consistent production speed of 10 meters per minute to maximize throughput. With its robust build and overseas technical support capability, it provides a reliable long-term solution for metal profile manufacturing.

Technical Specifications

Power Requirements

5.5 kW

Power

380 V

Voltage

Performance Metrics

10 m/min

Making Speed

Dimensions (L x W x H)

6600 x 1400 x 1300 mm

Compliance and Service

After-sales Support

- 1-year warranty
- Overseas engineer service available

Certifications

BV Certified

Logistics

Packaging and Delivery

Category	Detail
Packaging	Full Container Load
Lead Time	60 days
