

Metal Roofing and Wall Panel Forming Machine

This machine efficiently manufactures metal roofing and wall panels. It utilizes advanced rolling technology to ensure minimal material waste and optimal structural integrity.

Overview

High-Efficiency Metal Forming Solution

This industrial-grade tile forming machine is engineered for the high-volume production of colored steel roof and wall panels. Designed for reliability in steel construction projects, it features an automated PLC control system with a touch screen interface for precise operation. With a robust 5.5kW power system, it ensures consistent output and durability for demanding manufacturing environments.

Technical Specifications

Production Capacity

30 sets

Monthly Output

10 m/min

Forming Speed

Power Requirements

5.5 kW

Power

380 V

Voltage

Dimensions (L x W x H)

8.5m x 0.8m x 2.3m

Control System

PLC (Touch Screen)

Compliance & Logistics

Warranty & Support

- 1-year warranty
- Engineers available for overseas service

Origin & Condition

Attribute	Details
Condition	New
Origin	Hebei, China
