

Metal Shaping File

This is a metal shaping file with a textured surface. It is used for efficient material removal and smoothing in metalworking, woodworking, and other crafts.

Product Overview

Precision Metal Shaping File

This non-standard shaping file, identified by model numbers QG36082-QG36122, is engineered for effective material removal and surface refinement. Designed with a pointed tip and a specialized textured surface, it provides the control needed for intricate metalworking, woodworking, and various craft applications. Its robust construction ensures consistent performance and durability in demanding professional environments.

Technical Details

Suitable Applications

- Metalworking
- Woodworking
- General Crafting

Model Range	QG36082, QG36122
Shape	Round with pointed tip
