

Metal Shearing and Bending Machine

This cutting and fold-bend machine is designed for metal forming processes, specifically shearing and bending operations. It features a robust frame and a large working table.

Overview

Industrial Metal Forming Solution

This metal shearing and bending machine is engineered for high-precision fabrication tasks. Featuring a robust frame and a spacious working table, it provides the stability required for consistent industrial output. The integrated control panel allows operators to easily adjust cutting and bending parameters, ensuring versatility across various metal forming operations.

Technical Specifications

Construction Features

- Robust structural frame
- Large capacity working table
- Adjustable control panel

Model Designation	PLC-1600
Primary Functions	Metal Shearing, Metal Bending, Industrial Forming
