

# Metal Shearing and Bending Machine

This machine is designed for metal forming, performing both shearing and bending. It features a robust construction and a hydraulic system for precise and efficient metalworking.

## Overview

### Professional Metal Forming Solution

This robust metal shearing and bending machine is engineered for high-precision metal fabrication tasks. Designed with a durable construction and integrated hydraulic systems, it offers reliable performance for both cutting and folding operations. Featuring intuitive control panels and essential safety mechanisms like emergency stops and protective cages, it is an ideal choice for industrial metalworking environments.

## Technical Specifications

Model Number	WC67Y-100/3200
Core Capabilities	Metal Shearing, Metal Bending, Hydraulic System, Precision Forming

## Safety & Control

### Safety Equipment

- Protective safety cage
- Emergency stop buttons

Control Interface	Integrated control panel for parameter adjustment
