

# Metal Shearing and Bending Machine

This machine is designed for precise metal forming. It features a robust construction with a red base cabinet, a gray upper section, and a yellow safety guard around the cutting area.

## Product Overview

### Precision Metal Forming Solution

This industrial-grade shearing and bending machine is engineered for high-accuracy metal sheet processing. Featuring a robust construction with a reinforced base cabinet and integrated safety guards, it ensures stability and operator protection during heavy-duty tasks. The system combines hydraulic power with precise manual adjustments, making it an efficient choice for diverse metal fabrication requirements.

## Technical Specifications

### Key Features

- Integrated hydraulic cylinder system
- Precision handwheel adjustment mechanism
- Foot pedal operation for hands-free control
- Safety-focused design with protective guarding
- Multi-switch control panel with status indicators

### Build Quality

Heavy-duty cabinet, Industrial grade, Hydraulic powered, Safety-compliant

## Operational Details

### Control System

Foot Pedal Control • Manual Handwheel Adjustment • Indicator Lights
