

Metal Shearing and Bending Machine

This cutting and fold-bend machine is designed for metal forming applications, specifically shearing and bending. The machine incorporates pneumatic cylinders and hydraulic components for precise operation.

Overview

Industrial Metal Forming Solution

This metal shearing and bending machine is engineered for high-precision industrial metal forming applications. It features a robust, durable frame and utilizes a combination of pneumatic and hydraulic systems to ensure consistent performance during both cutting and bending operations. Designed for professional environments, it offers manual adjustment capabilities via integrated handwheels for enhanced control and versatility.

Technical Specifications

Key Components

- Dual electric motors with protective covers
- Pneumatic cylinders
- Hydraulic system components
- Manual adjustment handwheels
- Control panel with indicator lights

Power & Control

2 Units
Motor Configuration

Application

Shearing, Bending, Metal Forming, Industrial
