

# Metal Shearing and Bending Machine

This machine is designed for metal forming, specifically for shearing operations. It features a robust frame, a cutting head with a circular saw, and a control panel for precise adjustments.

## Overview

### Industrial Metal Forming Solution

This cutting and fold-bend machine is engineered for high-precision metal forming and shearing operations. Built with a robust frame, it ensures stability and durability for demanding industrial environments. The integrated control panel allows for precise adjustments, making it an efficient choice for accurate metal cutting and bending tasks.

## Technical Specifications

### Construction Type

Robust Frame

### Model Number

YDQ-500

### Primary Functions

Metal Shearing, Metal Bending, Metal Forming

### Cutting Mechanism

Circular Saw
