

Metal Shearing and Folding Machine

This machine is designed for metal forming, specifically shearing and bending operations. It offers precision cutting and folding capabilities, ensuring accurate and consistent results.

Overview

Professional Metal Forming Solution

This metal shearing and folding machine is engineered for high-precision metal fabrication tasks, combining cutting and bending capabilities into a single robust unit. Designed for demanding industrial environments, it provides consistent results and reliable performance for various manufacturing applications. Its durable construction ensures long-lasting operation, making it an essential tool for workshops requiring accurate metal forming.

Capabilities

Application Suitability

- Metal fabrication
- Industrial manufacturing
- Precision metal forming

Primary Functions

Shearing, Bending, Folding, Metal Forming

Performance

Key Performance Indicators

1 Machine

Integrated Operations
