

# Metal Shearing and Folding Machine

This cutting and fold-bend machine is designed for metal forming applications, specifically shearing. The machine is portable with handles on the top for easy transport.

## Product Overview

### Professional Metal Forming Solution

This versatile metal shearing and folding machine is engineered for precision metal forming applications. Featuring a robust, portable design with integrated cooling vents, it is built to withstand demanding workshop environments. The unit utilizes advanced IGBT inverter technology to ensure reliable performance and consistent results for various shearing tasks.

## Technical Specifications

Inverter Technology	IGBT Inverter
Model Series	LGK 100
Key Features	Portable, Digital Display, Integrated Cooling, Shearing Capability

## Design & Build

### Design Highlights

- Robust yellow and black color scheme
- Top-mounted carry handles for portability
- Side ventilation system for thermal management
- Intuitive front panel control interface
