

Metal Shearing and Folding Machine

This industrial machine is designed for metal forming operations, specifically shearing and folding. It features a robust construction with a large horizontal base and a vertical cutting head, incorporating a control panel for precise operation and automated processes.

Overview

Industrial Metal Processing Solution

This industrial metal shearing and folding machine is engineered for high-precision metal forming and fabrication operations. Featuring a robust horizontal base and a vertical cutting head, it provides the stability required for heavy-duty manufacturing environments. The integrated control panel ensures accurate operation and supports automated processing workflows for increased efficiency.

Technical Specifications

Control System

PLC Controlled

Model Designation

PLC-1200

Capabilities

Metal Shearing, Metal Folding, Metal Bending, Automated Processing

Construction

Heavy-duty industrial build
