

Metal Shearing and Folding Machine

This cutting and fold-bend machine is designed for metal forming operations, specifically shearing. The machine is built for industrial applications and offers reliable performance in metalworking environments.

Product Overview

Industrial Metal Forming Solution

This metal shearing and folding machine is engineered for high-precision metal forming operations. Designed with a robust frame to withstand demanding industrial environments, it ensures reliability and consistent performance. The integrated control panel and user-friendly interface allow operators to make precise adjustments efficiently, making it an essential tool for professional metalworking applications.

Technical Specifications

Construction

Robust Frame • Industrial Grade

Model Number	YL34K-250
Functions	Shearing, Folding, Bending, Cutting

Control System

Operational Capabilities

- Precise adjustment controls
- User-friendly operator interface
- Digital display for parameter monitoring

Control Interface	Digital Display Panel
