

Metal Shearing and Folding Machine

This metal forming machine is designed for cutting and fold-bending operations. It is a shearing machine used in metalworking processes.

Overview

Industrial Metal Forming Solution

This high-performance metal shearing and folding machine is engineered for precision metalworking operations. Featuring robust construction with integrated hydraulic components and multiple rollers, it provides reliable performance for demanding industrial applications. Designed for versatility, this machine efficiently handles both cutting and fold-bending tasks to streamline your production workflow.

Technical Specifications

Construction Features

- Robust heavy-duty frame
- Hydraulic operation system
- Multi-roller configuration

Application Suitability

Industrial Use • Precision Metalworking

Machine Type

Metal Shearing and Folding Machine

Primary Functions

Cutting, Fold-bending, Metal Shaping
