

Metal Shearing and Folding Machine

This high-performance machine is designed for precision metal forming. It integrates shearing operations with fold-bending capabilities to ensure efficient workflow and high-quality results.

Overview

Precision Metal Forming Solution

This high-performance machine is engineered for versatile metal shearing and folding operations. Designed for efficiency and precision, it integrates multiple forming capabilities into a single unit to streamline your manufacturing workflow. It is an ideal solution for workshops and production facilities requiring consistent, high-quality metal forming results.

Technical Specifications

Model ID	LGK-100
Machine Type	Shearing, Folding, Bending
