

Metal Sheet Cutting and Folding Machine

This heavy-duty machine is designed for industrial metalworking applications. It features a robust frame, precision cutting blade, and fold-bending capabilities for processing various metal sheets.

Product Overview

Industrial Metalworking Solution

This heavy-duty machine is engineered for high-efficiency metal sheet processing, combining robust cutting and precise fold-bending capabilities in a single unit. Designed for industrial environments, it features a durable frame and an integrated control panel that allows operators to fine-tune parameters for consistent, accurate results. It is an ideal solution for workshops requiring versatile and reliable performance when handling various metal sheet materials.

Technical Specifications

Machine Type	Cutting and Fold-Bend Machine
Primary Applications	Metal Cutting, Fold-Bending, Industrial Processing

Features

Key Capabilities

- Integrated control panel for parameter adjustment
- Precision cutting blade assembly
- Heavy-duty industrial frame
- Combined cutting and bending functionality
