

Metal Sheet Cutting and Folding Machine

This is a precision cutting and folding machine designed for accurate metal forming. It features a robust construction with a central actuator and dual side-mounted components.

Overview

Precision Metal Forming Solution

This metal sheet cutting and folding machine is engineered for high-accuracy metal fabrication tasks. Built with a robust frame, it features a central actuator and specialized side-mounted components to ensure consistent, reliable results. Designed for professional environments, it streamlines both cutting and bending processes in a single, efficient workflow.

Technical Specifications

Construction Features

- Robust frame construction
- Central actuator system
- Dual side-mounted components
- Integrated electrical connections

Machine Type	Cutting and Fold-Bend Machine
--------------	-------------------------------

Capabilities

Primary Functions	Metal Cutting, Sheet Folding, Precision Bending
-------------------	---
