

Metal Sheet Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets. It is used in various industries for shaping metal into desired forms.

Product Overview

About This Paraffin Wax

This fully refined paraffin wax is a high-quality industrial material designed for consistent performance in various manufacturing processes. It is supplied in a solid form, making it suitable for applications ranging from candle production to protective industrial coatings. Known for its exceptional purity and hardness, this product ensures reliable results with its low oil content and stable melting point.

Technical Specifications

Melting Point

| | |
|-----------------------------------|-----------------------------------|
| 58 °C Min Melting Point | 60 °C Max Melting Point |
