

Metal Sheet Cutting and Folding Machine

This heavy-duty machine is designed for metal forming applications. It features a lever-operated mechanism for controlled cutting and bending of various metal sheets.

Product Overview

Heavy-Duty Metal Forming Solution

This robust metal sheet cutting and folding machine is engineered for precision and durability in demanding metal fabrication environments. Designed with a reliable lever-operated mechanism, it provides controlled cutting and bending operations for a variety of metal sheets. The machine's heavy-duty construction ensures consistent, high-quality results, making it an essential tool for professional metal forming applications.

Electrical Specifications

Motor Compatibility

Phase	Power Rating	Voltage
1 Phase	1 HP	115/230 V
3 Phase	3/4 HP	200/230/460 V

Electrical Ratings

15 A

Max Amperage (125V)

10 A

Max Amperage (250V)

600 VAC

Max Voltage AC

Compliance and Standards

Certifications	UL Listed, Industrial Control Equipment, Inspected
Catalog Reference	Cat. No. 8860-1
