

Metal Sheet Cutting and Folding Machine

This heavy-duty metal forming machine is designed for cutting and fold-bending operations. It is engineered for precision and efficiency in shaping metal sheets.

Overview

Industrial Metal Fabrication Solution

This heavy-duty metal forming machine is specifically engineered for high-precision cutting and fold-bending operations. Featuring a robust construction, it is designed to withstand the rigors of demanding industrial environments while maintaining accuracy. This versatile equipment streamlines metal sheet fabrication, making it an essential asset for workshops requiring reliable and efficient shaping capabilities.

Technical Capabilities

Performance Metrics

1 Multi-function

Operation Type

Core Functions

Metal Cutting, Fold-Bending, Sheet Metal Forming

Design & Build

Build Quality

Heavy-duty Frame • Precision Blades • Industrial Grade
