

# Metal Sheet Cutting and Folding Machine

This machine is designed for accurately cutting and folding metal sheets. It is suitable for various applications requiring precise sheet metal fabrication.

## Product Overview

### Professional Metal Processing Solution

This metal sheet cutting and folding machine is engineered for precision and durability in demanding industrial environments. Designed to streamline fabrication workflows, it combines high-strength construction with robust performance capabilities. This versatile unit is an essential asset for workshops and manufacturing facilities requiring reliable, high-quality metal forming and cutting operations.

## Certifications & Standards

### Compliance

CE • GS • TUV • SUD

## Operational Features

### Key Capabilities

- Electric operation for consistent performance
- Durable construction for heavy-duty use
- High-strength components
- Remote control operation
- Emergency stop functionality
- Overload protection system

### Safety Features

Emergency Stop, Overload Protection
