

Metal Sheet Cutting and Folding Machine

This machine is used for cutting and folding metal sheets. It provides efficient and accurate performance for metal fabrication.

Product Overview

Industrial Metal Processing Solution

This Metal Sheet Cutting and Folding Machine is engineered for high-precision fabrication tasks, combining essential shearing and bending capabilities into a single unit. Designed for durability and consistent performance, it provides a versatile solution for workshops and industrial metalworking facilities. Its robust construction ensures reliable operation when handling various sheet metal thicknesses and materials.

Capabilities

Material Compatibility

- Sheet Metal
- Mild Steel
- Aluminum

Supported Operations

Cutting, Folding, Bending
