

Metal Sheet Cutting and Folding Machine

This precision machine is designed for cutting and folding metal sheets. It combines both capabilities in a single unit, allowing for efficient and accurate processing.

Overview

Precision Metal Processing Solution

This precision cutting and fold-bending machine is engineered for high-efficiency metal forming applications. By integrating both cutting and bending capabilities into a single, robust unit, it streamlines production workflows and ensures accurate processing of metal sheets. Designed for versatility, it features a durable frame, high-precision cutting blades, and adjustable bending tools suitable for a wide range of metalworking industries.

Technical Capabilities

Construction Features

- Robust frame construction
- High-precision cutting blades
- Adjustable bending tools

Core Functions

Cutting, Bending, Folding, Metal Forming
