

Metal Sheet Cutting and Folding Machine

This machine is designed for cutting and fold-bending metal sheets. It features a robust construction with a control panel for precise operation and adjustment.

Overview

Versatile Metal Processing Solution

This industrial-grade machine is engineered specifically for the cutting and fold-bending of metal sheets. Its robust construction provides the stability required for heavy-duty metal forming applications. Featuring a precise control panel and a specialized rolling or forming mechanism, it offers operators the control needed for accurate and reliable production.

Technical Features

Primary Functions	Cutting, Fold-bending, Rolling, Forming
Construction	Heavy-duty frame
Control System	Yes
