

Metal Sheet Cutting and Folding Machine

This cutting and folding machine is designed for precision metal forming. It features a robust frame, a high-power motor, and a precise cutting blade.

Overview

Precision Metal Forming Solution

This metal sheet cutting and folding machine is engineered for high-precision forming tasks in industrial environments. Featuring a robust frame and a high-power motor, it provides the stability required for consistent shearing and bending operations. The inclusion of a manual handwheel allows for fine-tuned adjustments, ensuring accuracy and reliability for professional sheet metal fabrication.

Technical Specifications

Primary Functions

- Metal Sheet Shearing
- Metal Sheet Bending
- Precision Forming

Model Identifier	SYB-500
Key Features	Precision Cutting, Heavy-Duty Construction, Manual Handwheel Adjustment, High-Power Motor
