

Metal Sheet Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets in industrial applications. It features adjustable settings, robust construction, and integrated wheels for portability.

Overview

Industrial Metal Forming Solution

The WSM-400 is a robust industrial machine engineered for precision metal sheet cutting and folding applications. Built for versatility in industrial environments, this unit features adjustable settings and durable construction to handle various metal forming tasks. Its integrated wheel design ensures excellent portability, allowing for flexible positioning within your workspace.

Technical Specifications

Model Number	WSM-400
Capabilities	Metal Shearing, Metal Bending, Metal Folding

Design & Build

Construction	Robust • Industrial Grade
Mobility	Yes
