

Metal Sheet Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets. It provides efficient and precise operation for various metalworking applications.

Product Overview

High-Performance Gasoline Engines

These gasoline engines are designed to provide reliable power for various industrial and construction machinery. Available in multiple configurations, they offer a balance of power and efficiency suitable for diverse operational requirements. With robust construction and precise packing dimensions, these units are engineered for easy integration and transport.

Engine Specifications

Available Engine Models

Model	Power Output	Net Weight (kg)	Gross Weight (kg)
Ey20	5.0HP	21	22
168F	5.5HP	20	21
Bag gasoline	2.0HP	5	6

Logistics and Packaging

Packing Dimensions

- Frame A (Ey20/168F): 515 x 390 x 510 mm
- Frame B (Ey20/168F): 460 x 440 x 485 mm
- Bag gasoline model: 282 x 354 x 345 mm
