

Metal Sheet Cutting and Folding Machine

This machine is designed for efficient metal forming. It excels in shearing operations, providing precise and clean cuts for various metalworking tasks.

Product Overview

High-Performance Metal Forming

This high-performance cutting and fold-bend machine is engineered for efficient metal forming and shearing operations. Its robust construction ensures exceptional durability and reliability, making it a dependable choice for demanding industrial environments. Designed to provide precise and clean cuts, this machine offers a versatile solution for a wide range of metalworking tasks involving sheets and plates.

Capabilities

Suitable Materials

- Metal Sheets
- Metal Plates

Primary Functions

Metal Cutting, Folding, Bending, Shearing

Performance

Key Performance Indicators

1 High

Cutting Precision

1 Robust

Construction
