

Metal Sheet Folding and Cutting Machine

This machine is designed for folding and cutting metal sheets. It provides efficient and precise processing for diverse metal fabrication requirements.

Product Overview

Versatile Metal Fabrication

This Metal Sheet Folding and Cutting Machine is designed for precision metal fabrication tasks. It combines folding and cutting capabilities into a single unit, streamlining workflow for workshop environments. Built for durability and ease of use, it provides consistent results for various sheet metal applications.

Ergonomics & Control

Primary Applications

- Bicycles
- Scooters
- Hand Tools
- Industrial Equipment

Handle Features

Ergonomic Grip, Ribbed Surface, Flanged Ends, Weather-Resistant
