Overview

High-Precision Die Cutting Solution

This versatile die cutting machine is engineered for high-precision creasing, cutting, and embossing tasks. Designed for efficiency, it is ideal for producing a wide range of paper packaging materials, including paper cups, plates, and various box styles. Built with robust construction, it ensures stability and consistent performance for high-volume manufacturing needs.

Capabilities

Processing Functions

- Creasing
- Die cutting
- Embossing

Suitable Applications

Paper Cups, Paper Plates, Paper Boxes, Square Boxes, Packaging Materials

Logistics & Service

Payment Terms

- 100% T/T (30% deposit, 70% balance before shipment)
- L/C at sight

On-site Support Available

Technical support for installation and operator training is available upon request. The buyer is responsible for the technician's daily allowance, travel tickets, accommodation, and food expenses.

Estimated Delivery Time

20-40 days after layout confirmation

Packaging for Delivery

Flexible packaging with iron underframe

Warranty Period

1 year
