

Metal Sheet Shearing Machine

This heavy-duty machine is designed for cutting metal sheets. It features a robust steel frame, a large work table, and a control panel for operation, suitable for industrial applications requiring precision and high-volume metal fabrication.

Product Overview

Industrial Metal Sheet Shearing Machine

This heavy-duty metal sheet shearing machine is engineered for high-volume industrial metal fabrication. Featuring a robust steel frame construction, it offers the durability and stability required for precision cutting operations. The hydraulically powered system ensures consistent performance, making it an essential tool for demanding manufacturing environments.

Technical Specifications

Power Source	Hydraulic
Primary Application	Metal Cutting, Sheet Metal Fabrication, Industrial Use
Frame Material	Robust Steel

Key Features

Operational Features

- Robust steel frame construction
- Large capacity work table
- Integrated control panel
- Hydraulic power system
