

Metal Slabs for Industrial Use

These metal slabs are ideal for various industrial applications. They are suitable for manufacturing, construction, and engineering projects.

Product Overview

Industrial Grade Metal Slabs

These metal slabs are designed for heavy-duty industrial applications, providing a reliable raw material source for manufacturing and construction projects. The plates are supplied in bundled, rectangular configurations, ensuring ease of transport and efficient warehouse storage. Each unit is treated for durability, making them suitable for demanding environments where structural integrity is paramount.

Material & Physical Properties

Material Composition	Industrial Steel
Form Factor	Rectangular Plates
Surface Condition	Treated, Oxidation Resistant

Logistics & Packaging

Storage Readiness

Warehouse Ready • Stackable

Packaging Method	Metal-strapped bundles
