

# Metal Tube Cutter

This tube cutter is designed for precise and efficient cutting of various tubing materials. Its sharp cutting wheel ensures clean and accurate cuts on copper, aluminum, and other soft metal tubing.

## Product Overview

### Professional Grade Tube Cutter

This professional-grade tube cutter is engineered for high-precision cutting of a wide variety of materials, including metals and durable plastics. Built for durability and accuracy, it ensures clean, burr-free cuts suitable for demanding B2B applications. It is an essential tool for contractors and technicians working with copper, aluminum, stainless steel, and plumbing-grade piping.

## Technical Specifications

### Cutting Capacity

**6 mm**

Minimum Diameter

**42 mm**

Maximum Diameter

### Available Models

- 212A
- 212B
- 212C

### Compatible Materials

Copper, Aluminum, Stainless Steel, PP, PE, PVC
