

Metal Wheel Rim for Industrial Machinery

This metal wheel rim is designed for use in industrial machinery. It features a glossy finish and ventilation apertures.

Product Overview

Heavy-Duty Industrial Wheel Rim

This metal wheel rim is engineered specifically for heavy-duty industrial machinery applications. Featuring a durable green protective coating, the design incorporates multiple circular and oblong apertures to facilitate optimal ventilation and secure mounting. Its robust construction ensures reliability and performance in demanding operational environments.

Design and Build

Color

Green

Design Features

- Circular ventilation apertures
- Oblong mounting apertures
- Reinforced rim structure

Surface Finish

Glossy protective coating

Application

Recommended Use

Heavy-duty machinery, Industrial processing, Replacement component
