

Metallic Cable Support Frame

This metallic I-frame is engineered to provide robust support and organization for cables. The frame features perpendicularly intersecting metal bars, each with U-shaped cable supports at the ends.

Product Overview

Metallic Cable Support Frame

This metallic I-shaped cable support frame is engineered for robust cable management and organization in demanding industrial or construction environments. Featuring a design with perpendicularly intersecting metal bars, each end is bent into a U-shaped cradle to securely hold and route cables. The bolted construction ensures structural integrity and reliability for heavy-duty cable support needs.

Technical Specifications

Construction Style	I-frame design with perpendicularly intersecting bars
Support Mechanism	U-shaped cable cradles at ends
Assembly	Bolted intersection

Usage

Primary Applications	Industrial, Construction, Cable Management
