

Metallic Gold Electronic Component

This is a rectangular electronic component with a metallic gold finish. It features a flat top surface with a small opening, designed for circuit board mounting.

Product Overview

Professional Grade Component

This metallic gold electronic component is engineered for reliable performance in circuit board applications. Its distinct rectangular design features a flat top surface, optimized for standard mounting processes. The central aperture and high-quality finish provide both functional utility and professional aesthetic integration for sensitive electronics assemblies.

Technical Details

Finish	Metallic Gold
Shape	Rectangular Block

Application

Design Features

- Centrally located aperture
- Flat top surface
- Compact block design

Mounting Type	Circuit Board Mount, Surface Mount Compatible
