

Metallic Thread Spool for Textile Machinery

This metallic thread spool is designed for textile machinery. It offers excellent tensile strength and durability, ensuring smooth and efficient operation in various apparel and textile applications.

Product Overview

Metallic Thread for Professional Textile Applications

This high-quality metallic thread is engineered specifically for use in industrial textile machinery. Designed for superior tensile strength and durability, it ensures smooth and efficient operation during complex manufacturing processes. It is a versatile choice for professional applications including weaving, knitting, and specialized apparel production.

Technical Specifications

Suitable Applications

Weaving, Knitting, Apparel Manufacturing, Textile Machinery

Handling and Storage

Handling Instruction

Keep Dry

Safety Note

Caution required during handling to maintain thread integrity.
