

Metallographic and Wood Sandpaper Sheets

Assorted sandpaper sheets are suitable for metallographic and woodworking tasks. They offer different grit sizes for coarse to fine abrasion on surfaces.

Overview

Professional Abrasive Solutions

These assorted sandpaper sheets are engineered for high-precision surface preparation and finishing tasks. Designed for versatility, they cater to both metallographic analysis requirements and general woodworking applications. The range of available grit sizes allows for effective material removal and fine surface polishing across various industrial settings.

Technical Specifications

Abrasive Material Types

- Diamond Abrasives
- Standard Industrial Abrasives

Grit Range

Coarse • Medium • Fine

Primary Applications

Metallography, Woodworking, Surface Preparation, Industrial Finishing
