

Metalworking Band Saw

This metalworking band saw is a robust and precise cutting machine designed for various metalworking applications. Its heavy-duty construction ensures stability and accurate cuts, while the powerful motor and variable speed control provide optimal cutting performance.

Overview

Precision Metalworking Solution

The GB400 Band Saw is a robust and precise cutting machine engineered for demanding metalworking applications. Its heavy-duty construction ensures exceptional stability and long-term durability, while the powerful motor and variable speed control deliver optimal cutting performance across a variety of materials. Equipped with an integrated coolant system and versatile angle cutting capabilities, this machine is designed to enhance efficiency and extend blade life in professional workshop environments.

Key Performance Metrics

Cutting Versatility

400 GB400

Model Capacity

Technical Features

Core Features

- Heavy-duty construction for stability
- Variable speed control
- Integrated coolant system
- Adjustable workpiece vise
- Angle cutting capability

Safety & Compliance

Safety Systems

Blade Guards, Emergency Stop
