

Metalworking Lathe

This precision lathe is designed for metalworking applications. It allows for accurate turning, facing, and threading operations on metal components.

Overview

Precision Metalworking Lathe

This industrial-grade metalworking lathe is engineered for high-performance turning, facing, and threading operations. Featuring a robust build and a wide range of spindle speeds, it offers the versatility required for diverse machining tasks. Its heavy-duty construction ensures stability and precision, making it an essential asset for professional metalworking environments.

Dimensions & Capacity

Distance Between Centers

- 1000
- 1500
- 2000
- 3000
- 4000

Swing Over Bed

1000 mm

Performance

Spindle Speed Range

9 rpm

Min Speed

938 rpm

Max Speed

Spindle Speed Steps

12

Spindle Bore

165 mm

Main Motor Power

11 kW
