

Metric Tapered Roller Bearing

These metric tapered roller bearings are designed to handle both radial and axial loads. They come in various sizes, each offering specific performance characteristics for diverse applications.

Product Overview

Metric Tapered Roller Bearings

These metric tapered roller bearings are precision-engineered components designed for robust performance in demanding technical applications. Featuring a tapered design, they are capable of handling combined radial and axial loads efficiently. This range includes various sizes to ensure compatibility with diverse engineering requirements, offering high load ratings and reliable operation.

Key Features

Design Configuration

Metric Series • Tapered Roller • High Load Capacity

Available Series

30203, 30204, 30205, 30206, 30207, 30208, 30209, 30210, 30302, 30303, 30304, 30305, 30306, 30307, 30308, 30309

Technical Specifications

Dimensional and Load Data

Bearing No.	Inner Dia (d) mm	Outer Dia (D) mm	Width (T) mm	Dynamic Load (Cr) kN
30203	17	40	13.25	20.7
30204	20	47	15.25	28.2
30205	25	52	16.25	32.2
30206	30	62	17.25	43.3
30207	35	72	18.25	54.2
30208	40	80	19.75	63
30209	45	85	20.75	67.9
30210	50	90	21.75	73.3
30302	15	42	14.25	22.9
30303	17	47	15.25	28.3
30304	20	52	16.25	33.1
30305	25	62	18.25	46.9
30306	30	72	20.75	59
30307	35	80	22.75	75.3
30308	40	90	25.25	90.9
30309	45	100	20	103.9
