

MFDIN88 12V Automotive Battery

The MFDIN88 12V car battery delivers reliable starting power for a variety of vehicles. Its maintenance-free design and robust construction ensure long-lasting performance.

Overview

High-Performance Automotive Power

The MFDIN88 is a maintenance-free 12V automotive battery engineered for reliable starting power across a wide range of vehicles, including cars, buses, and trucks. Built to DIN standards, this battery features a flame-retardant polypropylene container and advanced PE separators for enhanced durability and safety. It is designed to withstand demanding conditions, offering high temperature resistance, excellent vibration resistance, and low self-discharge rates.

Technical Specifications

Sealed design minimizes corrosion and prevents acid leakage for enhanced safety.

Voltage	12 V
Capacity (20hr)	88 AH
Cold Cranking Amps (-18)	700 A
Reserve Capacity	169 min
Dimensions (L x W x H)	353 x 175 x 190 mm

Construction & Design

Engineered for durability with advanced lead-acid technology to withstand extreme temperatures.

Standard

DIN Standard

Separator Material

PE

Container Material

Flame retardant PP

Color

Black

Performance Features

Key Advantages

- High temperature resistant
- Great vibration resistance
- Low self-discharge
- Maintenance-free design

Compatible Vehicles

Cars, Buses, Trucks

Warranty Period

1 year
